

**Dr. Stewart Cohen** is senior researcher with Environment Canada, and an Adjunct Professor with the Department of Forest Resources Management, University of British Columbia. He joined Environment Canada in 1984.

Dr. Cohen's research interests are in participatory approaches for climate change impacts and adaptation assessment, and exploring how climate change can affect sustainable development. Publications include case studies in the Great Lakes, Saskatchewan Basin, Mackenzie Basin and the Okanagan region. Ongoing work includes climate change visualization with the Collaborative for Advanced Landscape Planning (CALP) at UBC, climate change and forest management studies in Kamloops, Williams Lake and the Skeena region, and advising the Columbia Basin Trust's Communities Adapting to Climate Change Initiative. For the last 20 years, he has been a contributor to the Intergovernmental Panel on Climate Change (IPCC), which was awarded the Nobel Peace prize in 2007.

Dr. Cohen has taught courses on climate change at UBC, and in 2009, he completed a textbook, co-authored with Melissa Waddell, entitled "Climate Change in the 21<sup>st</sup> Century", and published by McGill-Queens University Press. He is collaborating with the Pacific Institute for Climate Solutions (PICS) in developing an online learning program called Climate Change Fundamentals.
